

Fresh Water

A speech and powerpoint presentation of our local water resources

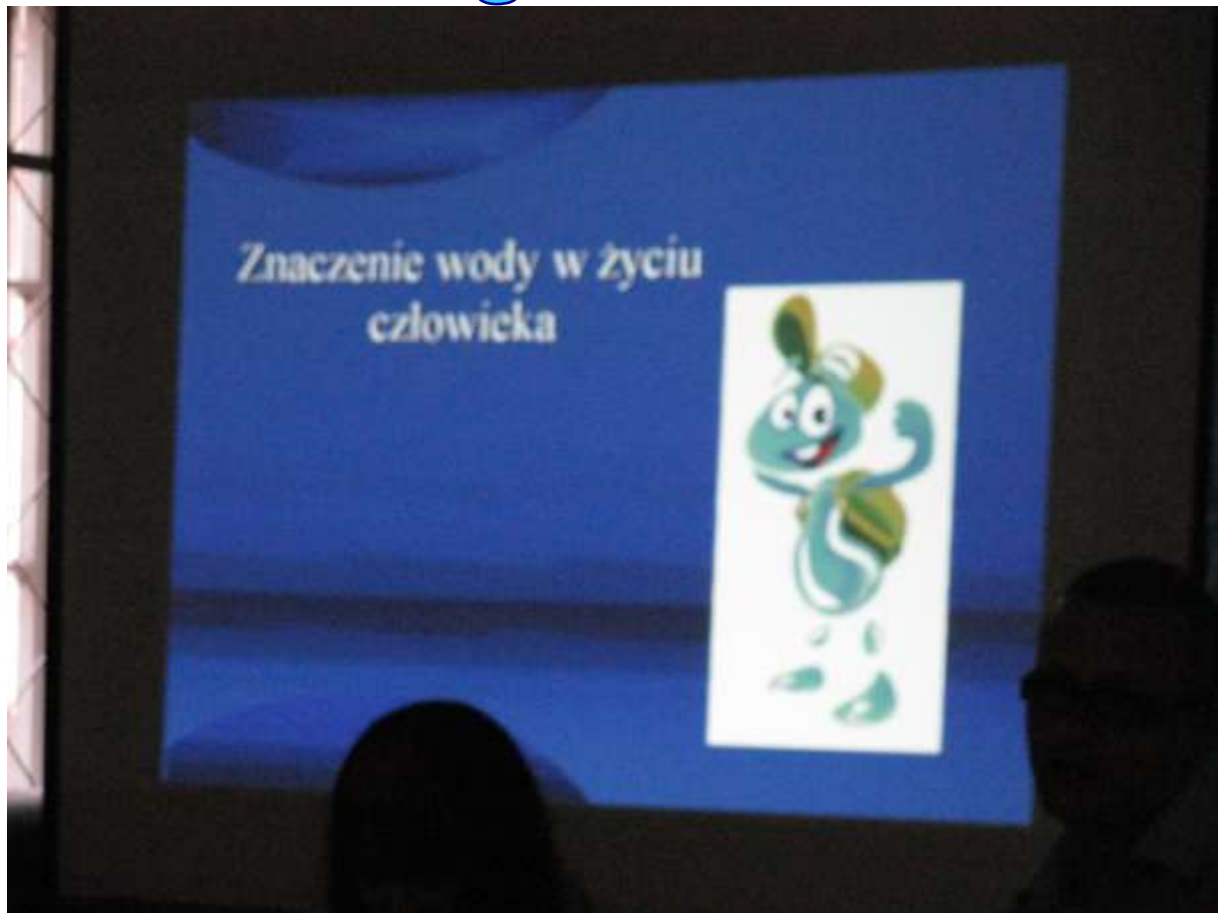

Fresh water

As far as the realization of our Comenius project is concerned on June the 6th 2011 the students of the 6th grades took part in the meeting with the workers of our local water resources called 'Hydrokom'. During the meeting they listened to the speech about the water, its sources, resources, ways of saving in everyday life. In addition they saw an interesting powerpoint presentation and at the end they received the cards containing pictures of water. We hope that after that whenever we turn on the taps we will think that water is a precious resource but not an endless one;)

Class VI B

1. The meaning of water in our lives

2. Saving water

2. Oszczędzanie wody

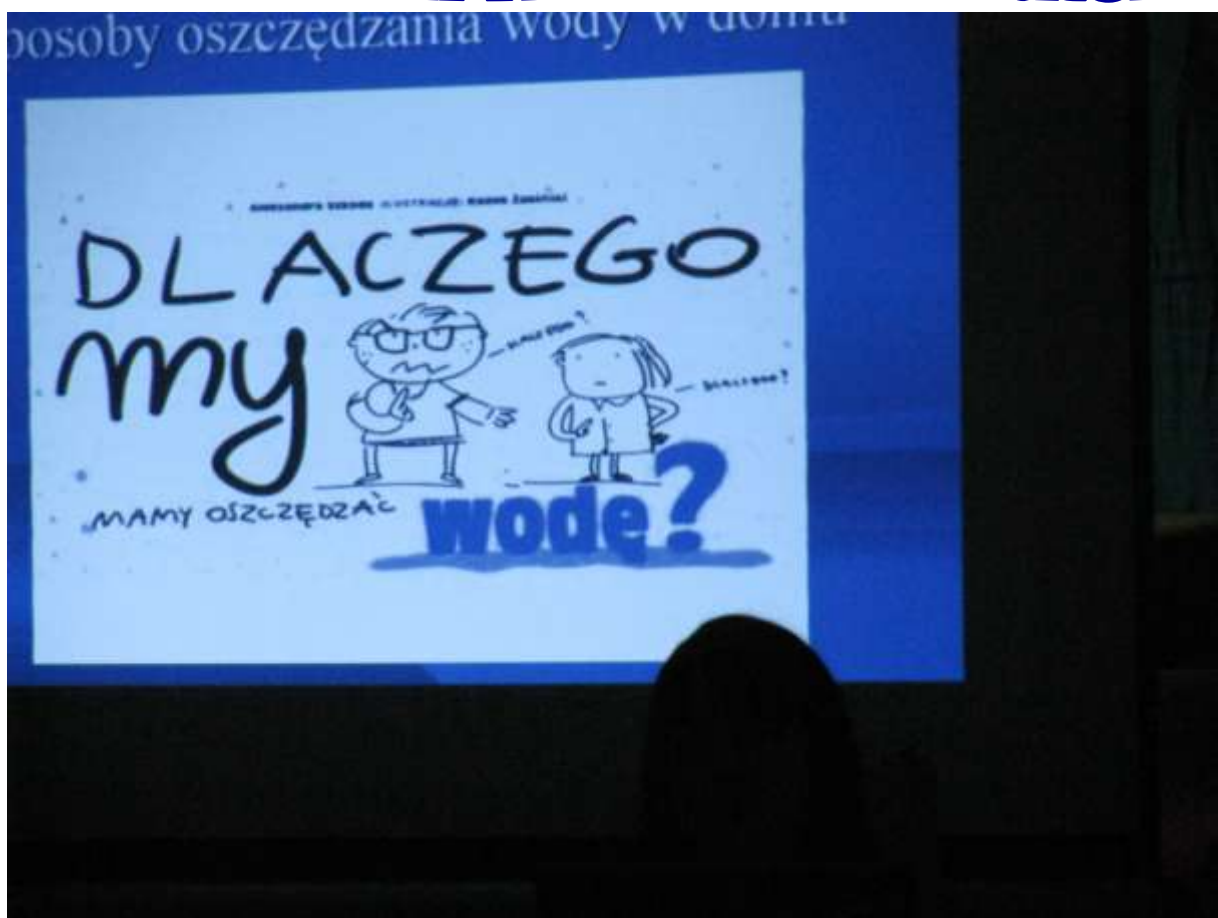

3. Repair of leaking pipes, cisterns and taps

4. The shower instead of the bath

5. Why shall we save the water?

6. We should water our plants with rain water

7. When our water is healthy

- gdy nie ma bakterii chorobotwórczych
- gdy nie zawiera szkodliwych dla zdrowia substancji
- gdy jest przejrzysta
- gdy nie ma nieprzyjemnego smaku i zapachu
